

Health and Safety

INSTRUCTION: ST003-001

TÍTULO: Roof securing

SCOPE: These instructions are applicable to all roofing activities in Asturias Cluster

VERSION: 0 **VALIDATION DATE:** January 2019 **NEXT REVIEW:** January 2024

PROCEDURE:

All roofing activities should follow these requirements:

1. When possible, conduct activities without being on the roof
2. When access to roofs can't be avoided:
 - Roof Assesment should be done by competent technician (third party).
 - When some of the controls rely on human performance, works shall be controlled by a third party.
3. In the case of **fragile or transparent roofs**, it is also mandatory to comply with:
 - Use of safety nets in addition to individual protections.
 - Where it is not possible to place safety nets, use other collective protections in addition to the individual protections that proceed + 100% monitored and controlled by a competent technician (third party).

ANEXOS: Roof Assesment
